ANNUAL STATISTICAL RETURNS
AND
SHORT NOTES ON VACCINATION IN
BIHAR AND ORISSA,
for the year
1914-15.

1. INTRODUCTORY.

Lt.-Col. E. C. HARE, I.M.S., was in charge of the Department throughout the year.

The office of the Deputy Sanitary Commissioner, Bihar Circle, was held by Major Brown, I.M.S., from 1st April to 7th September 1914, Major W. C. Ross, from 8th September to 24th October 1914, and myself from 24th October to 31st March 1915.

The office of the Deputy Sanitary Commissioner, Chota Nagpur Circle, was held by Dr. Sebastian throughout the year. He was also in charge of the Orissa Circle till 14th March 1915 when Dr. B. P. Mazumdar was appointed temporarily as Deputy Sanitary Commissioner of the Orissa Circle.

2. VACCINATION STAFF.

One hundred and forty-two paid and 999 Licensed Vaccinators and 20 Inspectors and 63 Sub-Inspectors were employed throughout the year. In addition to this three Sub-Inspectors were employed as Loaders in the Vaccine Depôt. Their services are transferrable with the district staff.

In Municipal towns and in the districts of Puri and Sambalpur vaccination was carried on by paid vaccinators. In other cases the work was done by licensed vaccinators as a rule except in a few cases where some paid vaccinators were employed by District Boards.

3. GENERAL OPERATIONS.

The total number of operations performed by all agencies amounted to 1,314,042 against 1,323,948 of the previous year. Of the total operations, 1,295,179 were performed by the vaccination department as compared with 1,299,788 of the last year; 1,242,316 were primary and 52,863 revaccinations against 1,281,100 primary and 18,688 revaccinations of the last year. The primary vaccinations fell by 38,784 and revaccinations rose by 34,175. In primary vaccinations the most marked decrease was in the districts of the Santal Parganas (10,173), Cuttack (23,083), Balasore (21,813) and Puri (12,644). There was some decrease in Gaya, Saran, Bhagalpur, Purnea, Angul, and Manbhum districts also. In the Santal Parganas the Civil Surgeon attributes the decrease partly to scarcity of food-grains and prevalence of malaria and partly to inexperience of the subordinate inspecting staff. In Cuttack the Civil Surgeon attributes decrease to irregular supply of vaccine, the prevalence of cholera and unsatisfactory work of some vaccinators. In Balasore scarcity of food grain and inability to pay fees is reported to be the cause of the fall. The Civil Surgeon of Puri reports the decrease to be due to an irregular and insufficient supply of vaccine.

The increase in the revaccination was due to greater attention being paid to revaccination on account of outbreak of small-pox in several districts. In Manbhum generally and especially the Jherria Coal Field the people willingly accepted revaccination though they were strongly opposed to it during the previous years. The total number of revaccinations was 16,539 in this district.

Of the total operations (1,295,179) 1,270,949 or 98.12 per cent. proved successful as compared with 1,284,609 or 98.9 per cent. of the last year. The percentage of success in primary and revaccinations in which the results were known was 99.69 and 73.51 respectively against 99.67 and 75.41 of the previous year.

There was an increase of 7,048 over that of the last year in the operations performed in municipalities. The ratio of success in municipalities was 98.17 for primary and 53.90 for revaccination as compared with 99.48 for primary, 69.62 for revaccination in rural areas.

4. VACCINATION IN COMPULSORY AREAS.

In the towns in which the Vaccination Act is in force 82.41 per cent. of the total number of children under one year of age were successfully vaccinated as compared with 77.70 per cent. of the previous year.

In the towns of Arrah, Muzaffarpur, Cuttack, Ranchi, Lohardaga, Palamau, Purulia, Kishanganj, Rajmahal, and Jhaldia the number of successful operations was in excess of that of the children available. It is reported that people from the adjoining villages bring their children to be vaccinated in the municipal area to avoid payment of fees.

5. MORTALITY FROM SMALL-POX.

The provincial rate of mortality from small-pox was .22 against .11 per 1,000 in the previous year. The following districts had a higher mortality than that prevailing in the province generally :--Balasore (.90), Patna (.48), Monghyr (.46), Bhagalpur (.35), Shahabad (.32), Purnea (.30), Manbhum (.43) and Singhbhum (.45).

6. PROTECTION AFFORDED TO INFANTS.

Out of 1,219,774, the estimated number of infants under one year available for vaccination, 629,670 i.e. 516.21 per thousand were successfully vaccinated against 461.88 in the previous year. The protection afforded was over 500 per mille in the following districts, which is satisfactory considering that vaccination is not compulsory in rural areas :-- Darbhanga, Bhagalpur, Purnea, Santal Parganas, Cuttack, Balasore, Angul, Sambalpur Hazaribagh, Ranchi, Palamau, Manbhum, and Singhbhum.

The protection to infants in municipalities is shown in the appendix attached. It will be seen that the protection afforded was 824.18 per mille of the surviving infant population against 777.02 of the previous year. The protection afforded in the Municipalities given below was inadequate :--Tikari, Dumraon, Motihari, Darbhanga, Monghyr, Bhagalpur, Katihar, Sahibganj, Sambalpur, and Hazaribagh. The attention of the Civil Surgeons concerned has been drawn to their responsibility in the matter of infant protection in these towns.

A comparative diagram illustrating the death rate from small-pox in each district, with the population protected against small-pox by vaccination during the past seven years is also attached.

7. INSPECTION.

The Deputy Sanitary Commissioners inspected 8,781 or .7 per cent. of primary cases of the total operations against 3.63 per cent. in the last year.

The Civil Surgeons inspected 78,646 primary and 7,162 revaccinations or 6.31 and 10.49 per cent. respectively against 7.27 and 14.71 of the previous year. The Civil Surgeons of Gaya, Saran, Champaran, Santal Parganas, and Ranchi inspected more than 5,000 operations.

The subordinate Inspecting Staff inspected 35.90 per cent. of the total operations as compared with 36.62 of the previous year. The District Inspectors of Patna, Saran, Champaran and Angul districts inspected more than 42 per cent. of the primary operations in their respective charges, while in 10 districts Sub-Inspectors of Vaccination inspected more than 50 per cent. of the total operations in primary cases.

The Health Officer of Muzaffarpur inspected 849 primary and 33 revaccination cases, respectively, and the Health Officer, Bhagalpur, 477 primary cases. Health Officers of municipalities have been made inspecting officers in the municipal areas.

The percentage of success reported by the vaccinators was 99.27 per cent. in the primary and 64.82 in revaccination cases, whereas that recorded by the Deputy Sanitary Commissioners and the Civil Surgeons was as given below:—

	Deputy Sanitary Commissioners.	Civil Surgeons.
Primary ...	98.89	99.34
Revaccination ...	—	65.26

8. SUPPLY OF VACCINE.

The Government Vaccine Dépôt at Namkum was completed about the middle of the year and the work of manufacturing lymph was started about the middle of September. From September to 31st March 1915, 510 calves were supplied to the Dépôt, of which 3 died before operation. The remaining 507 which were vaccinated yielded 94,180 grains of crude lymph or about 185 grains per calf. During the season 749,205 capillary tubes containing about half a grain of vaccine each were prepared and 541,522 were issued from the Vaccine Dépôt. But as the local vaccine dépôt could not supply the whole province, lymph had to be obtained from the Patwa Dangar Dépôt also, to supply the districts in Patna, Tirhut and Bhagalpur Divisions with the exception of Santal Parganas which was supplied from Namkum Dépôt.

The total cost of the Dépôt excluding the cost of the building was Rs. 19,367.7.9. The cost per tube or dose of lymph amounts to 4.9 pies. As the institution was new, and the arrangements for the supply of calves were not satisfactory the total lymph required for the province could not be manufactured and the cost was necessarily high. But now in the light of experience subsequently gained it is hoped that the Dépôt will turn out the full supply of lymph for the province at a considerably reduced cost. The results of the lymph issued from the Dépôt have been reported to be good. Dr. Sebastian, Deputy Sanitary Commissioner, Chota Nagpur Circle, was the supervising officer and Assistant Surgeon Dharendra Nath Mitra, the officer in charge of the Dépôt throughout the year.

9. COST OF THE DEPARTMENT.

The total cost of the Department during the year was Rs. 98,421 or Rs. 5,048 in excess of the last year. The cost per successful operation was Rs. 0.1.2 against Rs. 0.1.1 in the previous year.

10. FEMALE VACCINATION.

It was noted in last year's report that female vaccinators might with advantage be appointed by the municipal bodies of the province and the proposal was approved by Government. A reference on this subject has been made to all the Municipal bodies.

11. GENERAL.

As stated in paragraph 15 of the Sanitary Report a proposal for the extension of compulsory vaccination to the Patna and Phulwari thanas, including Digha, has been submitted to Government. The extension of the act to the area administered by the Mines Board of Health at Jherria, is also under the consideration of Government.

Act V of 1880 was extended to the Tata Iron Factory at Sakchi in the district of Singhbhum.

Owing to the redistribution of duties occasioned by the War, the services of no Deputy Sanitary Commissioner were available for the inspection of vaccination.

S. N. TIWARY,

Offg. *Sanitary Commissioner, Bihar and Orissa.*

Diagram illustrating death rates from Small pox and degree of protection afforded 1909-1915

Note—Thin lines indicate the death rates from small pox

Thick lines indicate the proportion of population protected by vaccination
